Applied Naval Architecture provides a wide range of services, including:

* Ship design and engineering * Shipbuilding and ship repair * Marine engineering * Engineering education * Expert witness testimony

The company's clients include shipyards, ship owners, naval architects, marine engineers, and other maritime professionals. Applied Naval Architecture has worked on a variety of projects, including:

* The design of the world's largest cruise ship * The construction of the first LNG-fueled cargo ship * The repair of the USS Cole after the terrorist attack in 2000 * The development of new engineering education programs for the maritime industry

Jim Scribbins: Applied Naval Architecture's Founder and CEO

Jim Scribbins is the founder and CEO of Applied Naval Architecture. He is a graduate of the University of Michigan, where he earned a Bachelor of Science degree in Naval Architecture and Marine Engineering. Scribbins has also earned a Master of Science degree in Engineering Management from George Washington University.

Scribbins has over 40 years of experience in the marine industry. He has worked as a naval architect, marine engineer, and engineering educator. Scribbins is a licensed Professional Engineer in the state of Virginia.

Scribbins is a member of the Society of Naval Architects and Marine Engineers (SNAME) and the American Society of Engineering Education (ASEE). He is also a Fellow of the International Institute of Marine Engineering.

Scribbins is a highly respected expert in the field of naval architecture and marine engineering. He is frequently invited to speak at conferences and seminars. Scribbins has also published numerous articles and papers on naval architecture and marine engineering.

Applied Naval Architecture's Services

Applied Naval Architecture provides a wide range of services to the marine industry. The company's services include:

Ship Design and Engineering

Applied Naval Architecture provides ship design and engineering services for all types of vessels, including:

* Commercial ships * Naval ships * Offshore vessels * Special purpose vessels

The company's ship design and engineering services include:

* Conceptual design * Preliminary design * Detail design * Production engineering * Construction support

Shipbuilding and Ship Repair

Applied Naval Architecture provides shipbuilding and ship repair services for all types of vessels. The company's shipbuilding and ship repair services include:

* New construction * Conversions * Repairs * Refits * Upgrades

Marine Engineering

Applied Naval Architecture provides marine engineering services for all types of marine structures, including:

* Ships * Offshore platforms * Marine terminals * Coastal structures

The company's marine engineering services include:

* Structural analysis * Hydrodynamic analysis * Mechanical engineering * Electrical engineering * Control systems engineering

Engineering Education

Applied Naval Architecture provides engineering education services to the marine industry. The company's engineering education services include:

* Development of new engineering education programs * Delivery of engineering education courses * Training of engineering professionals

Expert Witness Testimony

Applied Naval Architecture provides expert witness testimony in cases involving naval architecture and marine engineering. The company's expert witness testimony services include:

* Technical analysis * Report writing * Deposition testimony * Trial testimony

Applied Naval Architecture's Clients

Applied Naval Architecture's clients include shipyards, ship owners, naval architects, marine engineers, and other maritime professionals. The company's clients are located all over the world.

Applied Naval Architecture has worked on a variety of projects, including:

* The design of the world's largest cruise ship * The construction of the first LNG-fueled cargo ship * The repair of the USS Cole after the terrorist attack in 2000 * The development of new engineering education programs for the maritime industry
