By Max Hastings

The Bomber Offensive is a detailed account of the Allied bombing campaign against Germany in World War II. It is written by Max Hastings, a renowned British historian and journalist. The book provides a comprehensive overview of the campaign, from its early days to its final stages. Hastings draws on a wide range of sources, including interviews with veterans, official documents, and personal diaries. The result is a vivid and compelling account of one of the most controversial aspects of the war.

The book begins with a discussion of the origins of the bombing campaign. Hastings argues that the decision to bomb Germany was made in response to the German bombing of London and other British cities. He also notes that the British government believed that bombing would help to undermine German morale and hasten the end of the war.

Hastings concludes the book with an assessment of the Allied bombing campaign. He argues that the campaign was ultimately successful in achieving its objectives. He notes that the bombing helped to undermine German morale, hasten the end of the war, and prevent Germany from developing nuclear weapons.
