

# Everything You Need to Know About Albino Guinea Pig Lifespan, Care, Health and More

Albino guinea pigs are a unique and beautiful breed of guinea pig. They are known for their white fur and pink eyes. Albino guinea pigs are caused by a genetic mutation that prevents them from producing melanin, the pigment that gives skin, hair, and eyes their color.

Albino guinea pigs have a shorter lifespan than other guinea pigs, but they can still live a happy and healthy life with proper care. In this article, we will discuss everything you need to know about albino guinea pig lifespan, care, health and more.

The average lifespan of an albino guinea pig is 5-7 years. This is shorter than the lifespan of other guinea pigs, which is typically 8-10 years. However, with proper care, albino guinea pigs can live longer.

There are a number of factors that can affect the lifespan of an albino guinea pig, including:

- **Diet:** Albino guinea pigs need a diet that is high in vitamin C. Vitamin C is essential for guinea pigs, and it helps to prevent scurvy.
- **Exercise:** Albino guinea pigs need plenty of exercise. Exercise helps to keep them healthy and prevents boredom.
- **Socialization:** Albino guinea pigs are social animals. They need to interact with other guinea pigs in order to stay happy and healthy.
- **Veterinary care:** Albino guinea pigs need regular veterinary care. This includes checkups, vaccinations, and dental care.

Albino guinea pigs have the same basic needs as other guinea pigs. They need a cage that is large enough for them to move around freely, a diet that is high in vitamin C, and plenty of exercise. However, there are a few additional things that you need to keep in mind when caring for an albino guinea pig.

- **Light:** Albino guinea pigs are sensitive to light. You should provide them with a cage that has a shaded area where they can retreat to if they need to get out of the sun.
- **Temperature:** Albino guinea pigs are also sensitive to temperature. You should keep their cage at a temperature between 65 and 75 degrees Fahrenheit.
- **Eye protection:** Albino guinea pigs have pink eyes, which are more sensitive to sunlight than dark eyes. You should provide them with a pair of sunglasses to protect their eyes from the sun.

Albino guinea pigs are more prone to certain health problems than other guinea pigs. These health problems include:

- **Deafness:** Albino guinea pigs are often deaf. This is because the gene that causes albinism also affects the development of the inner ear.
- **Skin cancer:** Albino guinea pigs are more susceptible to skin cancer than other guinea pigs. This is because they lack the melanin that helps to protect skin from the sun's harmful rays.
- **Eye problems:** Albino guinea pigs are more likely to have eye problems than other guinea pigs. This is because their pink eyes are more sensitive to light and more prone to infection.

It is important to take your albino guinea
