Getting Started

To get started with knitting, you will need a few basic supplies:

- **Yarn:** Yarn is the thread that you use to knit. There are many different types of yarn available, so you can choose one that suits your project

and your budget.

- **Knitting needles:** Knitting needles are used to hold the yarn and create the stitches. There are two main types of knitting needles: straight needles and circular needles. Straight needles are used for knitting flat pieces, while circular needles are used for knitting in the round.
- **Scissors:** You will need scissors to cut the yarn.
- **Measuring tape:** A measuring tape will help you keep track of your progress and ensure that your knitting is the correct size.

Once you have your supplies, you can start learning the basic knitting stitches. The two most basic stitches are the knit stitch and the purl stitch. Once you have mastered these two stitches, you can start knitting simple projects, such as scarves, hats, and blankets.

Knitting Stitches

There are many different knitting stitches that you can learn, but the most basic stitches are the knit stitch and the purl stitch.

Knit stitch: The knit stitch is the most basic knitting stitch. To knit a stitch, insert the right-hand needle into the next stitch on the left-hand needle from front to back. Wrap the yarn around the right-hand needle and pull it through the stitch. Slip the new stitch onto the right-hand needle and drop the old stitch off the left-hand needle.

Purl stitch: The purl stitch is the opposite of the knit stitch. To purl a stitch, insert the right-hand needle into the next stitch on the left-hand needle from back to front. Wrap the yarn around the right-hand needle and pull it

through the stitch. Slip the new stitch onto the right-hand needle and drop the old stitch off the left-hand needle.

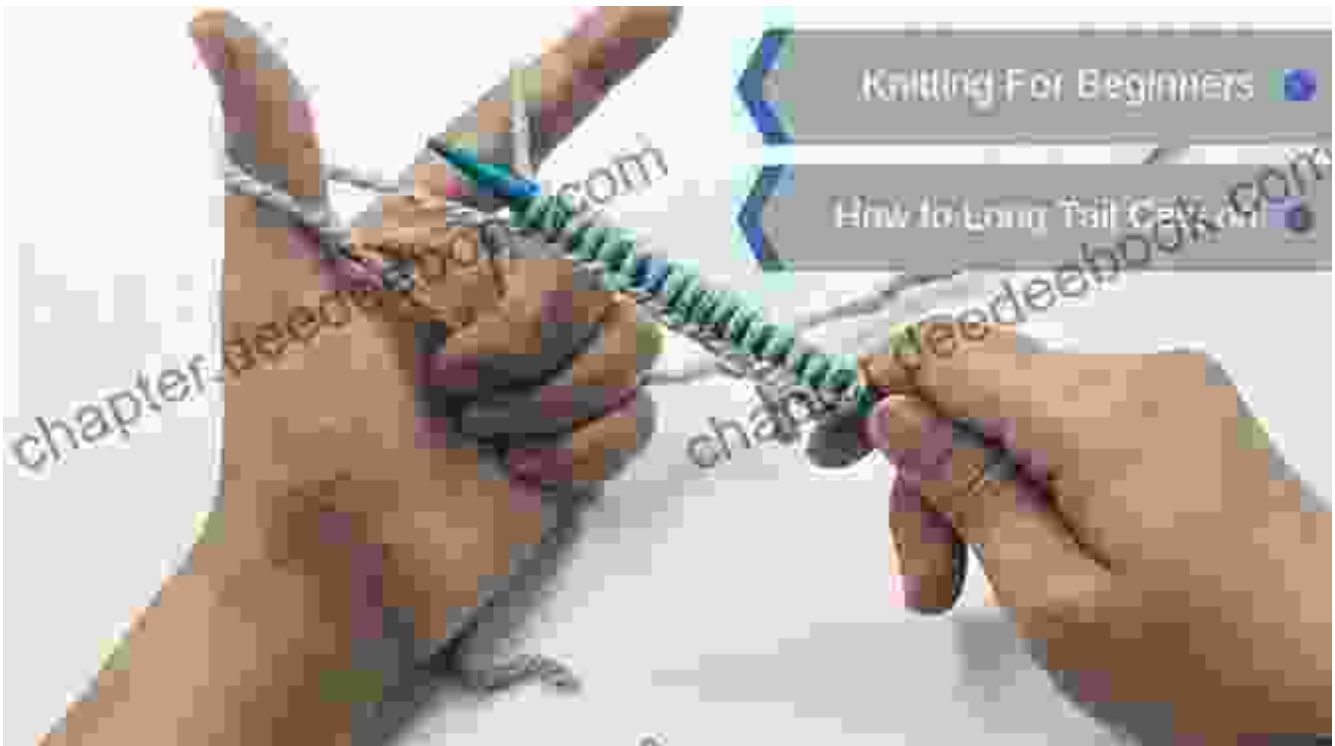

Casting On

Casting on is the process of creating the first row of stitches on your knitting needles. There are many different ways to cast on, but the most common method is the long-tail cast on.

Long-tail cast on: To cast on using the long-tail cast on, make a slip knot and place it on the left-hand needle. Hold the tail of the yarn in your left hand and the working yarn in your right hand. Insert the right-hand needle into the slip knot from front to back. Wrap the yarn around the right-hand needle and pull it through the slip knot. Slip the new stitch onto the right-hand needle and drop the old slip knot off the left-hand needle. Repeat this process until you have the desired number of stitches on your needles.

Casting Off

Casting off is the process of binding off the last row of stitches on your knitting needles. There are many different ways to cast off, but the most common method is the bind-off stitch.

Bind-off stitch: To bind off using the bind-off stitch, knit the first two stitches on the left-hand needle. Slip the first stitch over the second stitch and off the left-hand needle. Knit the next stitch on the left-hand needle and

slip it over the first stitch and off the left-hand needle. Repeat this process until you have only one stitch left on the left-hand needle. Cut the yarn and pull it through the last stitch to bind it off.

Binding Off

Binding off is the process of joining the edges of your knitting together. There are many different ways to bind off, but the most common method is

the mattress stitch.

Mattress stitch: To bind off using the mattress stitch, insert the right-hand needle into the first stitch on the left-hand needle from back to front. Wrap the yarn around the right-hand needle and pull it through the stitch. Slip the new stitch onto the right-hand needle and drop the old stitch off the left-hand needle. Insert the right-hand needle into the second stitch on the left-hand needle from front to back. Wrap the yarn around the right-hand needle and pull it through the stitch. Slip the new stitch onto the right-hand needle and drop the old stitch off the left-hand needle
